BEAUTY AND THE BEE

BEAUTIFUL SKIN - YOUR ASSET

Beautiful skin is a prized asset. We have all seen instances where a woman's appearance is dulled by a lacklustre complexion, or a man's innate good looks marred by skin pitted with scars. A radiant complexion appeals to the observer, a smooth one lets the enhancement of makeup shine through while firm and

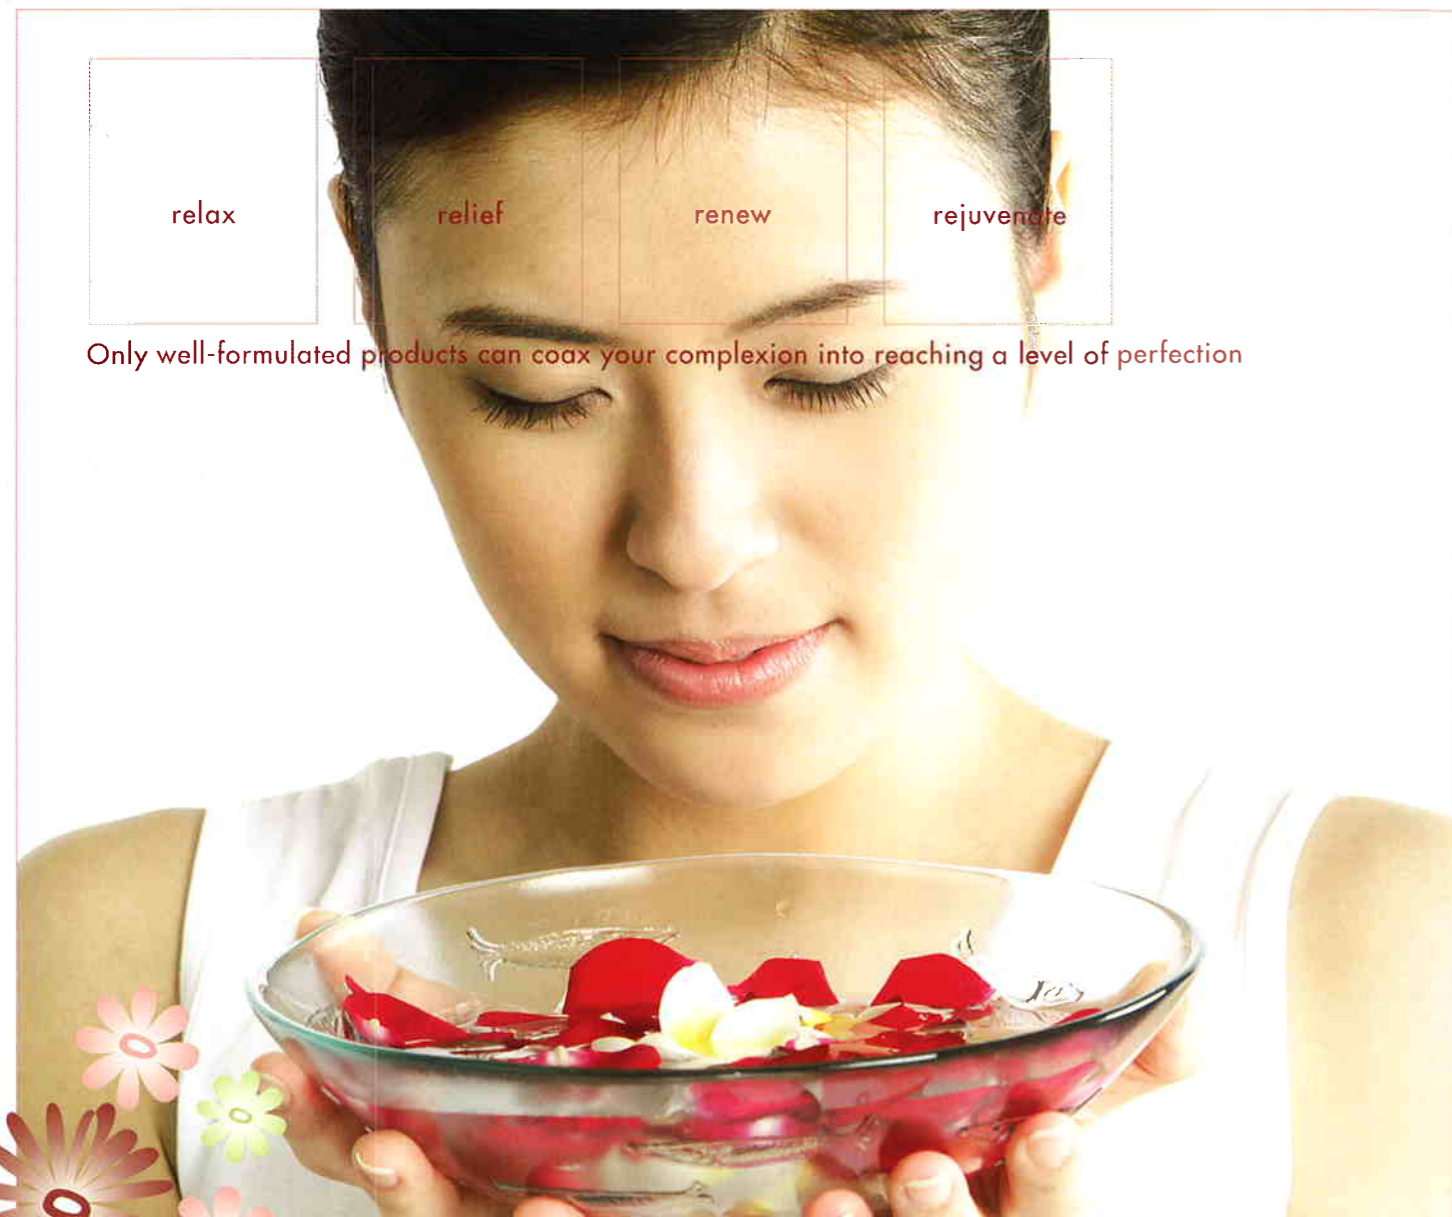

youthful skin is what every man and woman hope to achieve, whatever their age.

To reach these goals, you need a blend of correct diet, exercise and healthy lifestyle. However, while eating properly, keeping active, avoiding stress and pollution,

and discarding bad habits such as smoking all contribute to better skin, only well-formulated products can coax your complexion into reaching a level of perfection. Such products also delay the onset of ageing, and so prolong your youthfulness.

A potent melting of scientific methods and traditional ingredients goes into the making of two of Dawyn's key formulations, Beaugene and Progene. An equally powerful component comes from one of nature's most precious bounties, Royal Jelly. Over the next few pages, we will show how you, too, can help your skin achieve the kind of flawlessness you truly deserve.
