Nutrition For Vitality & Energy

■ LIVING HEALTHIER

According to scientific research, our physical body starts to age at the age of 30 even though we don't see the changes.

Ageing is the process of degeneration of body cells and organ systems. This process is continuous. Living longer is no longer a problem but living longer and healthier is.

■ OPTIMUM HEALTH MAINTENANCE

Narish Classic is specially developed to achieve optimum health through the regulating and upgrading of the main organ systems, antioxidants to reduce damages caused by free radicals and enhancing immunity to provide protection and faster recovery.

■ NARISH CLASSIC

Narish Classic is a natural supplement that combines the essence of East and West. Chinese herbalism (TCM) sees the human body as the sum of various parts that are linked to one another. Just like a car, all parts must be "nourished" to function properly so that the car can continue to run at maximum capacity and with the least problems.

In modern western medicine, the balance between antioxidation and oxidation is believed to be a critical concept for maintaining a healthy biological system. This is the western essence of Narish Classic.
