LOOK & FEEL BETTER WITH PROGENE

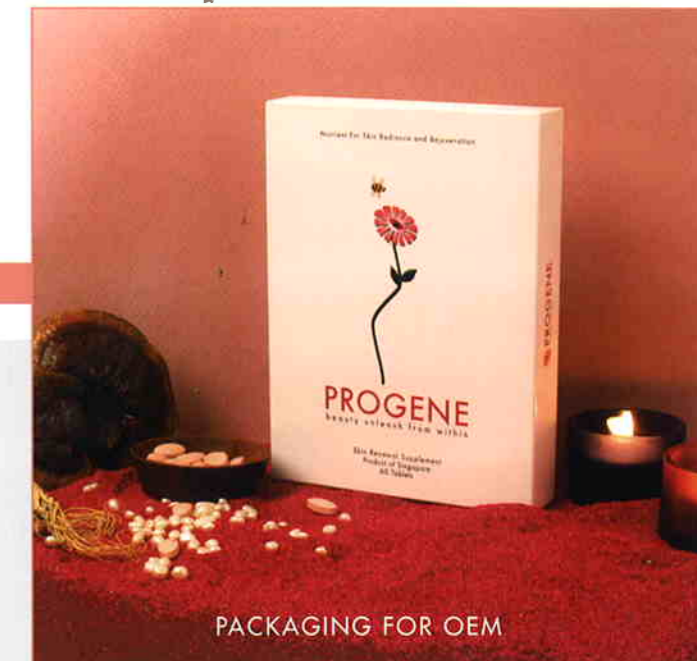

- PUTS YOUR SKIN BACK IN PEAK CONDITION
- ELIMINATES & PREVENTS FRECKLES, DARK SPOTS & UNSIGHTLY SCARS
- HELPS RETAIN YOUTHFULNESS OF SKIN
- STRENGTHENS YOUR IMMUNE SYSTEM
- ENHANCES YOUR WELL-BEING

Progene is an oral supplement that is unlike any other beauty product. It taps on the efficacy of traditional Chinese herbs (with powerful antioxidants) and it is developed based on progressive Western science. As a total cell renewal program, Progene provides the necessary nutrients to enhance skin beauty through ingestion.

These nutrients include Wheat Grass (for its powerful antioxidant Super Oxide Dismutase or SOD), Royal Jelly, Hydrolysed Pearl Powder and four top-grade TCM herbs: Lingzhi, Ginseng, Chinese Yam and Job's Tear Seeds. The TCM herbs and Royal Jelly supply the body with more than 20 types of amino acids, vitamins and minerals to improve overall health.

SOD is a powerful antioxidant from wheat grass, capable of devouring free radicals in its path. Free radicals damage the body's cells and are widely responsible for illness and ageing. SOD not only slows down the ageing process but also wards off diseases and promotes general well-being. So in fact, taking Progene will help destroy the free radicals within your body.

PACKAGING FOR OEM

FREE RADICALS AND YOU

Our body is constantly bombarded by free radicals. They can be triggered off by any number of things, including stress and pollution. Essentially "rebel" molecules, or reactive byproducts of chemical processes in the body, free radicals degenerate healthy cells and create havoc in the system. Where skin is concerned, free radicals deteriorate the skin's support structures, causing damage and leading to premature ageing.

Like most oral supplements, Progene has to be taken regularly to feel and see its effects. Within weeks, you will enjoy the visible results of an improved complexion and also the non-visible benefits of improved immunity, vitality and well-being.

SPECIAL HERBS

- S.O.D**
(Super Oxide Dismutase)
- Antioxidant from young wheat grass
 - Removes free radicals effectively
 - Prevents cell damage
 - Delays the effects of ageing

- ROYAL JELLY**
- Energises the body
 - Slows down the ageing process
 - Delays the formation of wrinkles
 - Rejuvenates the skin

- GINSENG**
(Radix Ginseng)
- Helps to replenish vital energy
 - Helps to promote production of SOD & other enzymes

- LINGZHI**
(Ganoderma lucidum)
- Provides nutrients to the Body
 - Helps to detox

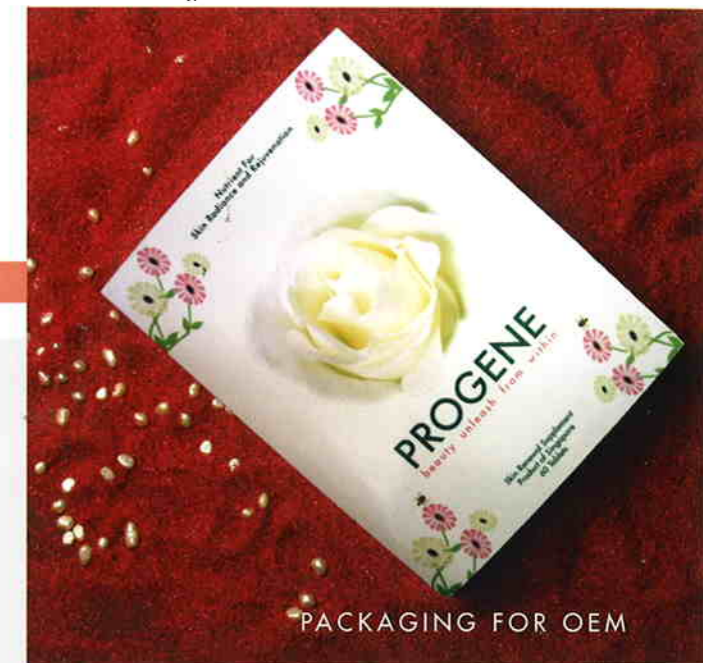

- JOB'S TEARS**
(Semen Coicis)
- Helps to strengthen the skin
 - Assists in eliminating spots
 - Assists in reducing water retention

- CHINESE YAM**
(Rhizoma Dioscoreae)
- Helps to nourish the skin
 - Adds radiance & moistures the skin
 - Prevents wrinkles and sagging of skin

- HYDROLYSED PEARL POWDER**
(Margarita)
- Hydrates the skin
 - Blocks out the sun's rays
 - Contains proteins which renew the skin cells

PACKAGING FOR OEM

One way to combat free radicals is through the use of antioxidants. There are many types and they work in various ways. Antioxidants in cosmetic products protect the skin from environmental factors while antioxidants taken orally, either through food or supplements, help to neutralise the reactive byproducts and slow down free-radical damage.

It is now widely accepted that antioxidants should be an integral part of an anti-ageing regime. Since Progene is a compound SOD-nutrient tablet, and not the usual single SOD-ingredient product, it reinforces its antioxidant abilities, thus ensuring its effectiveness.

With heightened effectiveness, Progene delays ageing even more to keep your skin in peak condition. It helps to eliminate pigmentation like freckles, ageing spots and scars. The overall effect of Progene is that you will gain a smooth and radiant complexion.

WHY PROGENE IS GOOD FOR YOU

- It is a powerful antioxidant
- It upholds the skin's support structures
- It slows down the free-radical damage
- It helps to regenerate new cells internally
- It rejuvenates and revitalises skin

As Progene is also a health supplement, it benefits your overall health as well. Taken regularly, it will strengthen your immune system and enhance your total well-being.

PROGENE'S INGREDIENT COMPOSITION

Lyophilized Royal jelly, SOD, Hydrolysed Pearl Powder, Ginseng, Lingzhi, Job's Tears and Chinese Yam.

WHEAT GRASS WITH SOD

Super Oxide Dismutase (SOD) is an enzyme that revitalizes the cells and reduces the number of cells being destroyed. SOD has been shown to help reduce facial wrinkles, reduce scar tissue, heal wounds and lighten dark hyper pigmentation. It also protects the skin from the sun's harmful UV rays. SOD regulates collagen and elastin formation to keep skin strong, smooth and supple.
